Some of the common lubricant usage gaps:

Gap 1: Using multiple vendors.

Solution: A Fluid Management Program allows you to employ lean management practices for lubricant usage by dealing with one company to: purchase new lubricants, monitor lubricants while in use and disposal of waste lubricant by-products.

Gap 2: Infrequent lubricant change-outs.

Solution: A Fluid Management Program ensures optimum lubricant usage in order to maintain product quality, employee health, and lengthen equipment life.

Gap 3: Too frequent lubricant changes.

Solution: A Fluid Management Specialists can recommend a better lubricant for an application while staying within OEM maintenance guidelines.

Gap 4: Environmental Compliance

Solution: A Fluid Management Program ensures your wastes are stored, handled and disposed of in accordance of Ministry of Environment guidelines.

INTERESTING FACTS

"M.I.T. estimates that 6% to 7% of America's gross national product, about \$240 billion - is spent repairing factory machinery damaged from wear caused by poor lubrication." ¹
